

# Powered for Business and Pleasure

Smartphone and Projector Technology Come Together in a Device that Takes Mobile Capabilities to the Next Level

**Akyumen offers a portable, lightweight, and easy-to-use projector smartphone, ideal for professional and educational settings as well as various personal uses.**

Project business presentations, review spreadsheets, and participate in video conferences with processing power and memory space unmatched by any other phone in the market.

Share your photos with friends and family, read stories, and play video games or movies with high definition projection resolution and size.

With one touch, you can project anything from your phone's screen onto any surface utilizing the most advanced projector smartphone, right in the palm of your hand.

Akyumen's projector smartphone comes standard with capabilities and features far exceeding even the most advanced models of other devices.
